EDUCATION

Bachelor of Science (B.S.) in Computational Mathematics | University of California, Riverside

EXPERIENCE

Software Engineer Intern | AI Squads | Irvine, CA

Feb 2026 – Jun 2026

Accomplishments:

- Implemented AI PDF detection with Claude Vision to auto-place e-sign fields, achieving 70% placement accuracy.
- Automated tracking for 400+ users via Docker/Supabase/PostgreSQL/Typescript, as a founding SWE intern.
- Engineered IDP pipeline with multimodal LLM bounding boxes, reducing manual e-sign field placement by 40%.
- Migrated web E-Sign & content creation tools to desktop via React/Vite; resolved complex dependency issues.
- Debugged CORS/OAuth issues via E2E tests, logs, and API isolation, shipping 5 AI-powered productivity tools.

Duties:

- Collaborated with an Agile team of 5 engineers to attend weekly meetings, discuss, and communicate progress.
- Wrote technical documentation of ongoing projects, system issues, and coordinated updates via Linear and Slack.
- Planned, built, and took ownership of feature requests and tickets, operating independently and collaboratively.
- Utilize AI tools such as Claude Code, Antigravity, and Replit to rapidly research, prototype, and debug projects.

AI Teaching Assistant | Campus.edu | Sacramento, CA

Dec 2025 – March 2026

Accomplishments:

- Created and published 5-minute learning tutorials to teach students how to migrate Replit projects over to GitHub.
- Collaborated with 7 adjunct faculty to coordinate student learning objectives (SLOs) and delegate responsibilities.

Duties:

- Acted as subject matter expert for Replit agentic development platform, assisting students with technical inquiries.
- Held weekly office hours to assist students with complex concepts, consult on projects, and troubleshoot issues.

Section Leader (Programming Instructor) | Stanford University | Stanford, CA

Apr 2025 – Jun 2025

Accomplishments:

- Led 10+ students through 8 weeks of Stanford's Intro to Python Programming course via 'Code in Place' program.
- Collaborated with a global team of 1,400+ volunteer instructors to help teach 20,000+ learners across the globe.

Duties:

- Provided structured code reviews, personalized feedback, and live debugging sessions reinforcing best practices.
- Communicated complex technical concepts in understandable non-technical language for diverse audiences.

PROJECTS

OneKit: Co-launched AI-native SaaS Product Suite with knowledge base; owned E2E development of the E-Sign tool.
Data-Driven Communities: Built a GIS portfolio analyzing urban planning and equity using ArcGIS Pro and StoryMaps.
Filipino Artist Gallery: Designed a static artist gallery with HTML/CSS/JS to showcase Filipino musical artists.
Community Hot Spots: Engineered a full-stack GIS app for 3rd places in the Inland Empire using JS and Supabase.

SKILLS

Languages	Python, C#, C++, JavaScript, MySQL, PostgreSQL
Developer Tools	Docker, Supabase, NET SDK, Git, Azure, Figma, VSCode
AI Tools	Claude Code, Antigravity, OpenAI, Replit, v0, Bolt

COURSEWORK

Relational Databases (SQL), Geographic Information Systems (GIS), Full-Stack Web Development, AWS Cloud Foundations, Artificial Intelligence, Data Structures & Algorithms, C++ Object-oriented Programming, Computer Science, Software Construction, Systems Analysis & Design, Automata and Formal Languages, Discrete Structures, Linear Algebra, Numerical Analysis, Optimization, Combinatorics, Ordinary and Partial Differential Equations, Game Theory.
